

Sustainable Green Assets for Modern Business Infrastructure.

A lush, manicured landscape creates an indelible corporate impression while boosting employee well-being and carbon neutrality. Cleantech delivers end-to-end commercial horticulture programs powered by trained agronomists, mechanized turf cutters, organic soil care, and precision irrigation management across India.

Core Horticulture Sub-Solutions

Mechanized Lawn & Turf Care

De-thatching, rotary mowing, edge edging, weed eradication, and seasonal aeration to maintain uniform golf-grade turf on campus greens.

Hedge Trimming & Topiary Art

Precision branch sculpting, ornamental hedge trimming, boundary border upkeep, and prompt clearance of biological yard debris.

Indoor Plantscaping & Rental

Curated air-purifying indoor flora, executive desk greens, fortnightly rotation, leaf dusting, and organic micronutrient sprays.

Smart Micro-Irrigation Care

Routine inspection and calibration of automated drip lines, pop-up sprinklers, water timers, and efficient root-zone watering valves.

Soil Nutrition & Pest Shields

Enriched organic vermicompost top-dressing, mycorrhizal root boosters, eco-safe botanical pesticides, and balanced pH conditioning.

Seasonal Floral Design

Custom bed design, seasonal sapling plantations, decorative mulch layering, and rockery upkeep tailored to aesthetic corporate entrances.

CERTIFIED PROTOCOLS

Maintenance Schedule & Standard Protocol

Activity Focus	Execution Cycle	Scope & Deliverables
Lawn Mowing & Edging	Weekly / Bi-Weekly	Mechanized cutting, border edging, clearing grass clippings, and boundary line trenching.
Shrub Pruning & Trimming	Bi-Weekly	Aesthetic sculpting of foliage, deadheading faded blossoms, and clearance of dry undergrowth.
Nutrient Supplementation	Monthly	Application of vermicompost, bone meal, neem cake, and bio-fertilizer blends around root zones.
Indoor Plant Maintenance	Twice a Week	Foliage wiping, soil tilling, moisture meter monitoring, replacement of stressed planters.
Eco-Pest & Fungus Control	As Needed / Fortnightly	Preventative organic neem oil applications and biological fungicides on sensitive shrubs.
Irrigation Network Check	Weekly	Nozzle descaling, pressure verification, timer adjustment, and pipe leak remediation.

The Cleantech Advantage

Certified Agronomists

On-ground teams supervised by trained botanists who conduct seasonal soil tests and plant health audits.

Modern Mechanization

Battery and fuel-efficient mowers, electric pole shears, and quiet equipment that respect office working hours.

100% Statutory Safety

Background-verified staff with full PF/ESI compliance, standardized uniform sets, and safety gear.

Schedule a Campus Landscape Audit

Complimentary preliminary evaluation and customized green AMC proposals.
