

**Restorative Precision, Gloss Retention & Surface Longevity.**

High foot-traffic in commercial atriums, healthcare corridors, and corporate lobbies demands specialized mechanical restoration beyond standard cleaning. Cleantech deploys heavy-duty rotary scrubbers, diamond honing compounds, and micro-crystallization treatments to protect and restore architectural floor investments across India.

**Comprehensive Floor Care Solutions**

**Marble & Stone Crystallization**

Multi-stage diamond honing and thermo-chemical vitrification to deliver high-reflectivity, scratch-resistant shine on Italian marble, granite, and Kota stone.

**Mechanized Heavy Scrubbing**

Single-disc rotary scrubbers coupled with industrial wet extraction and pH-balanced cleaners to remove embedded grime, grease, and discoloration.

**Granite Grinding & Buffing**

Resin-bond diamond polishing to eliminate traffic wear paths, level joint lippage, and restore natural depth and gloss without slippery residue.

**Industrial Epoxy & PU Upkeep**

Non-abrasive scrubber-dryer maintenance, dust-proofing, and protective polyurethane coating applications for manufacturing floors and cleanrooms.

**Tile & Deep Grout Sanitization**

High-pressure rotary brush extraction on ceramic and vitrified surfaces paired with antimicrobial grout sealing against mold and odor penetration.

**Anti-Slip & Protective Sealants**

Fluoropolymer surface impregnators that enhance traction on ramps and high-moisture entryways while repelling oil, water, and staining agents.

Surface-Specific Maintenance Protocols

| Floor Substrate              | Maintenance Cycle    | Mechanized Methodology & Scope                                                                            |
|------------------------------|----------------------|-----------------------------------------------------------------------------------------------------------|
| Italian & Imported Marble    | Monthly / Quarterly  | Diamond resin honing (400–3000 grit) followed by fluorosilicate crystallization and high-speed buffing.   |
| Granite & Hard Stone         | Quarterly AMC        | Deep descaling, rotary scrubbing with nylon grit pads, and penetrating protective sealant application.    |
| Industrial Epoxy Flooring    | Weekly / Fortnightly | Automated walk-behind/ride-on scrubber-dryer washing with neutral pH detergents and micro-fiber drying.   |
| Vitrified & Ceramic Tiles    | Bi-Weekly            | High-torque scrubbing, specialized grout brush cleaning, and anti-static dusting across common corridors. |
| Terrazzo & Polished Concrete | Bi-Monthly           | Densifier chemical treatment, lithium hardener application, and ultra-high-speed orbital burnishing.      |
| High-Moisture Wet Zones      | Weekly               | Anti-microbial descaling, acidic salt neutralization, and anti-skid chemical coating inspection.          |

The Cleantech Advantage

**Taski & Klindex Fleet**

Equipped with high-torque single-disc machines, orbital burnishers, and industrial wet-vacuum extractors.

**Substrate-Safe Chem**

Zero harsh acids. We utilize certified pH-balanced strippers and non-yellowing crystallization compounds.

**Trained Specialists**

Certified technicians skilled in diamond grit selection, lippage levelling, and zero-disruption night-shift execution.

**Schedule a Floor Surface Assessment**

Complimentary gloss meter test and customized restoration quote for your facility.
