

 Cleantech technicians in protective gear applying targeted pest management in office pantry

Targeted Bio-Security, Compliance Audits & Odorless Pest Protection.

A single pest sighting can compromise regulatory audits, contaminate food zones, and harm brand equity. Cleantech delivers science-backed Integrated Pest Management (IPM) designed for corporate offices, IT parks, hospitality spaces, healthcare centers, and logistics warehouses across India—ensuring complete eradication with zero operational disruption.

Core Pest Management Solutions

Cockroach Gel Baiting

Non-disruptive, odorless fipronil and imidacloprid bait matrices placed in server rooms, electrical conduits, and cafeteria cabinets with zero downtime.

Rodent Proofing & Bait Stations

Tamper-resistant external bait boxes, ultrasonic repellent integration, and runway trapping to protect network cabling and inventory stock.

Subterranean Termite Treatment

Drill-and-inject chemical barriers (Bifenthrin/Imidacloprid) around masonry perimeters, wooden casework, and archival storage vaults.

Flying Insect & Vector Control

Thermal fogging of external drains, larvicidal sprays for stagnant water, and installation of discreet electric fly insect traps (EFIs).

Warehouse Stored Product Pest Care

Pheromone monitoring traps, grain beetle containment, pallet fumigation, and crack-and-crevice residual barrier applications.

Microbial Sanitization & Audits

High-touch bio-fogging post eradication to neutralize pathogens, eliminate pest scent trails, and deliver digital compliance certificates.

Target Pest Protocols & Treatment Frequency

Target Infestation	Frequency	Methodology & Active Solution
German Cockroaches	Monthly AMC	Micro-dot gel baiting inside hinges, motor housings, and pantry junctions without vacating staff.
Rats & Field Mice	Fortnightly Checks	Tamper-proof bait stations along outer perimeter walls and sticky glue pads in false ceilings.
Mosquitoes & Flies	Weekly / Bi-Weekly	Cold ULV misting along landscaping and thermal fogging around stormwater drains and basements.
Subterranean Termites	5-Year Warranty	Continuous chemical soil barrier along foundation walls with pressure injector rods.
Bedbugs / Textile Pests	Two-Cycle Treatment	Targeted contact spray followed by a 15-day nymphal break-cycle booster application.
Drain Flies & Micro-Pests	Bi-Weekly	Bio-enzymatic foam descaling to digest organic scum in floor traps and washroom drains.

On-Ground Field Applications

 Cleantech technician treating office workstations and under-desk cable trays with precision spray

Workstation Perimeter Care

 Technician applying residual spray treatment in warehouse storage racks and pallets

Logistics & Pallet Defense

 Inspection of electrical distribution conduits and riser shafts for pest ingress

Utility Shafts & Conduit Checks

CIB&RC Molecules

Strictly 100% government-registered chemicals. Non-staining, low toxicity, and safe for human-dense workplaces.

Licensed Field Staff

Technicians trained in biology-based IPM tactics, wearing standard PPE and calibrated compression sprayers.

Digital Audit Logs

Instant electronic service sign-offs, bait station consumption logs, and proactive pest trend analytics.

Book a Facility Pest Vulnerability Audit

Complimentary premises survey and tailored corporate IPM AMC proposal.
